

Attorney's Case No. 1-707

ABSTRACT OF THE DISCLOSURE

A cooler for chilling food is particularly suited for outdoor buffet service and has an ice tray and a base that raises the ice tray off the ground. The ice tray is formed from insulated walls defining an interior compartment and includes a bottom wall and a side wall extending around the outer periphery of the bottom wall. The bottom wall has an upper surface that slopes away from the side wall to a drain that extends through the bottom wall. The cooler can be drained without tilting the cooler.
